

# our advantages

The below mentioned advantages bring as a result a considerable cost saving comparing our solutions with the rest of the products that the market offers; shorter installation time, less maintenance needed and avoiding critical points in every installation as the power supply and soldering works.

## Long Continue Strip

Our standard strips are delivered in reels of 100m (up to 300m upon request).

## No Power Supply Needed

Connect directly our strip to your AC source without any extra power supply.

**PATENTED**

## Solderless Connection Solutions

The first connection solutions in the market where soldering is not needed. Our patented solution ease the installation works reducing time and costs and at the same time avoiding quality problems. IP65 rated connection system. The profile of the strip is specially designed to fit these connectors.

**PATENTED**

## High Efficiency

Our AC Strips can reach efficiencies higher than 100lm/w

## Short Cutting Distance

Do not waste extra meters of strip. Get more accurate dimensions with our strips.

## Low Flicker and dimmable

Specially designed to be dimmable and avoid flickering.
